

New College

- Are you having a tough time deciding what career path to follow after graduation?
- Do you have workplace questions but don't know who to ask?

Find all the answers and more with the **New College Career Mentorship Program**

Our **Career Mentorship Program** helps **second, third, and fourth-year** students explore career paths with New College alumni and friends. We try to match students with alumni mentors who are employed in areas relevant to their studies.

The program is not designed to get a job after graduation, instead it is an opportunity to learn networking skills and get firsthand experiences in the workplace. In past years, mentors have spoken to students about their work and invited them to various activities, such as office tours, observing in-classroom teaching or sitting in on presentations at boardroom meetings.

ELIGIBILITY:

To participate in this program you must be willing to sign a contract agreeing that if we find a match, you will commit to at least three meetings/contacts with your mentor.

Since New College is a multi-faculty college, our alumni mentors represent a variety of professions such as:

Advertising/Production · Accounting/Auditing · Banking/Finance · Biotechnology (consulting)

Dentistry · Education · Human Resources · Investment Management · Law

Medicine · Nursing · Public Health · Writing/Editing · Law · Law Enforcement

Business Analysts · Neuroscience · Journalism · Professor Emeritus - Research

Graduate Student (Master of Science) · Computer Science · Marketing · Health Policy

Analysis · Economics · Pharmacy

Government Relations (lobbying, Stakeholder relations management, and strategic solutions)

Here's what some of our past mentees say about the program:

“I think the New College Mentorship Program itself is super awesome! My mentor, Dr. Rupert, was amazing! He was helpful and has given me various suggestions that have aided me tremendously- for example in terms of what to do for medical school applications, such as where to apply.”

Chesarahmia DojoSoeandy, Program Mentee

“Joining the New College Mentorship Program has been one of the best choices I've made at U of T. What I got out of this opportunity is indescribable. I recommend this program to anyone who may have lost their way. My mentor, Milena, reignited my passion for a career in law and clarified doubts that were potentially guiding me away from law school.”

Amy Liu, Program Mentee

“My experience in this mentorship program has been absolutely phenomenal! My mentor, Dr. Goldenberg, took the time to discuss with me what he observed with each of his patients shortly after he diagnosed them. I also had the opportunity to accompany him on rounds at Toronto Western Hospital, which was also interesting. Overall, this was a great experience and I would highly recommend it to students in the future.”

Annieza Mohamed, Program Mentee
